ENDURANCE GOLD

CORPORATION

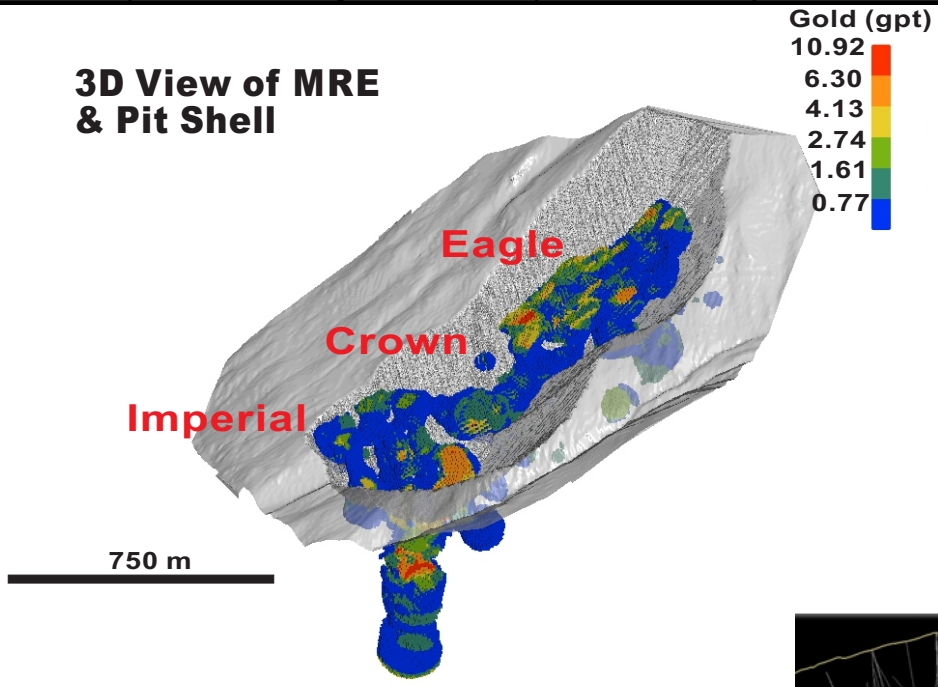

Reliance Project, BC – Advancing to Preliminary Economic Assessment

Endurance Gold is a precious metals exploration and development company focused on expanding the inaugural inferred mineral resource of 19.6 M tonnes containing 1.45 Moz grading 2.3 gpt gold at the Reliance Gold Project, B.C. and advancing to an initial preliminary economic assessment.

Reliance Mineral Resource Estimate

January 8, 2026 — Inferred

Zone	Au Cutoff (gpt)	Tonnes (Mt)	Gold Grade (gpt)	Contained Gold (Moz)
OP	0.3	15.6	2.23	1.12
UG	1.0	4.0	2.58	0.33
TOTAL	**0.3, 1.0**	**19.6**	**2.30**	**1.45**

**The Mineral Resource Estimate ("MRE") was prepared for Endurance Gold Corp. by Ginto Consulting Ltd. in accordance with NI 43-101 – Standards of Disclosure for Mineral Projects. Please see the news release dated January 19, 2026 for additional disclosure for the MRE with an effective date of January 8, 2026.*

Mineral Resources, which are not Mineral Reserves, do not have demonstrated economic viability. There is no certainty that all or any part of the mineral resources estimated will be converted into mineral reserves. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, sociopolitical, marketing, changes in global gold markets or other relevant issues.

The CIM definitions were followed for the classification of the mineral resources. The inferred mineral resources have a lower level of confidence and must not be converted to mineral reserves. It is reasonably expected that the majority of inferred mineral resources could be upgraded to indicated mineral resources with continued exploration.The technical and scientific information in this presentation has been reviewed and approved by Darren O'Brien, P.Geo. who is a Qualified Person as defined by National Instrument 43-101 Standards of Disclosure for Mineral Projects.

Reliance Project, Gold Bridge, B.C. (100%)

Orogenic Gold - Antimony

- 100% owned – 10 km NE of Bralorne Mine with +4 million ounces of historic gold production. Next to existing roads and hydro-electric power.
- Inaugural Reliance Inferred Mineral Resource of 19 Million tonnes with 1.45 million ounces at 2.3 gpt gold. Open to expansion in pit and at depth with 1.1 km vertical extent.
- Test work shows gold recovery of 84% to a marketable concentrate. Associated antimony recovery test work in progress to determine recovery economics.
- 1.5 km of 4 km long Royal Shear Host Structure tested with RC drilling.
- New 1.3 km Eagle Offset target with gold defined and drill tested.
- Five other sub-parallel targets with high gold and antimony values require 2027 drill testing.

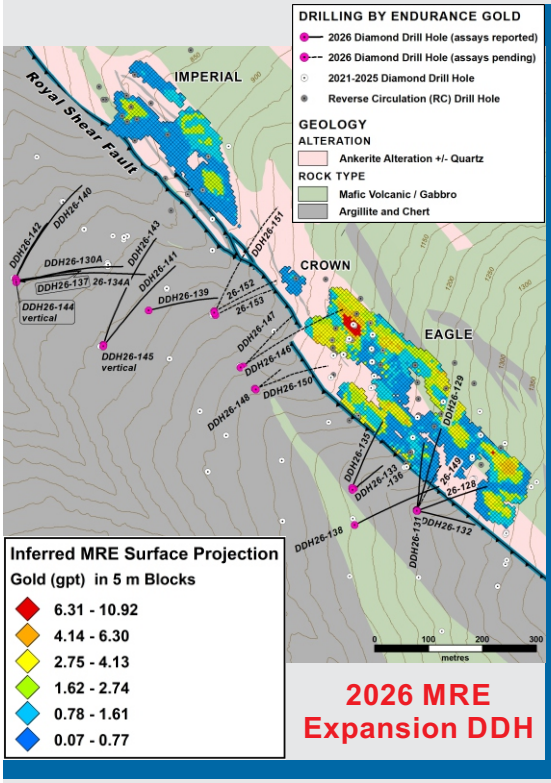

2026 Work

MRE Expansion Drilling Completed
10,505 m in 26 DDH

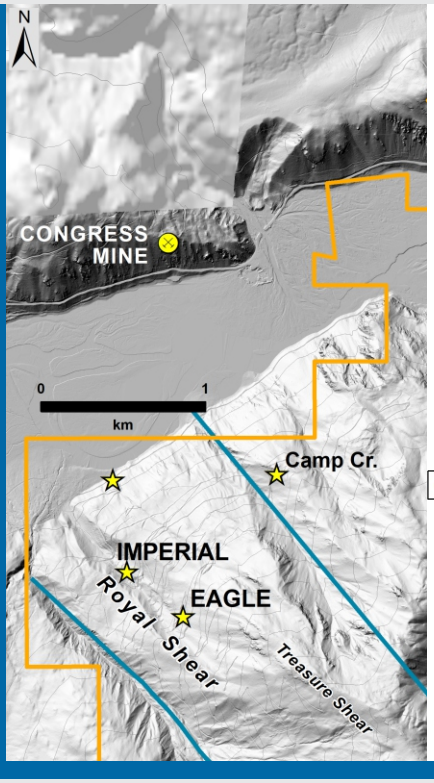

Q1 2027 MRE in progress

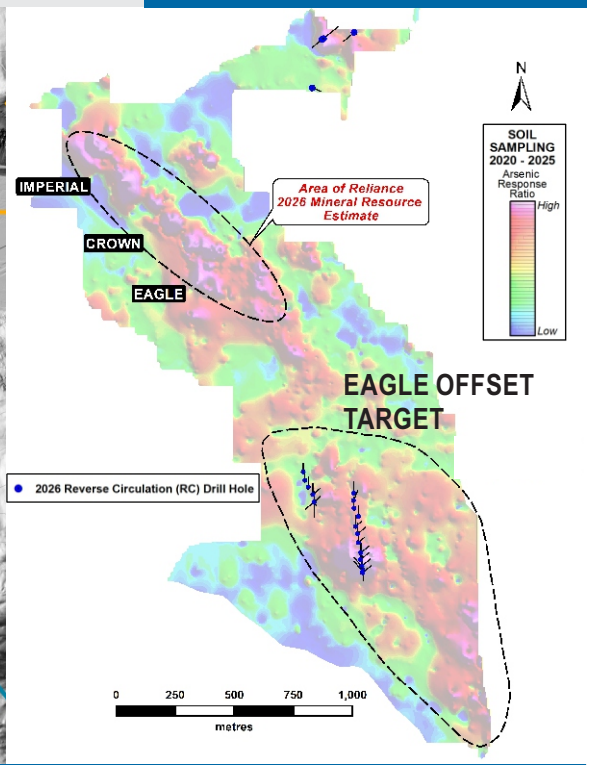

New Eagle Offset Target
2,906 m in 38 RC Holes

Antimony & Recovery Metallurgy Active

2026 MRE Expansion DDH

Elephant Mtn. Project, Alaska (100%)

Reduced Intrusive Hosted Gold

- 100% owned - Road accessible in the Tintina Gold Belt, near Manley Hot Springs.
- Reduced Intrusive hosted Stockwork and Shear hosted Gold.
- Seven priority targets over 12 km – 6 targets warrant drilling.
- **South Zone:** Gold-Antimony in soil anomaly 1,400 x 250 m – DDH returns ***4.0 gpt Gold / 4.6 m*** – untested high priority IP chargeability anomaly.
- **North Zone:** DDH returns ***0.4 gpt Gold & high Antimony / 147.1 m*** – Large associated IP chargeability anomaly.
- **Trout Target:** Never drilled - Grab samples up to 23.1 gpt gold. 1,000 x 300 m >100 ppb soil anomaly +25 m wide shear zone. Soil grid includes **high gold-in-soil values up to 2,330 and 2,100 ppb gold**. Trench: 0.510 gpt gold over greater than 12 m.
- Further drilling warranted. **Spinout / option / sale strategies being considered.**
